ABOUT ME

I'm 28, I've been working since I was 14 and I have a diverse professional career, which has provided me with skills and experience in different areas. Since the beginning of 2022, I have worked as a developer, the profession where I found myself and in which I am focused on constantly growing and evolving. My goal is to build a solid career, contributing with impactful technological solutions and improving my technical and social skills. I have been married since 2018, which reinforces my sense of responsibility, dedication and commitment, both in my personal and professional life.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Z.ro Bank - Payments institution

01/2023 – present
Recife, PE, Brazil

Developer allocated through Let's Sistemas in an Internet Banking project, focusing on the development of new functionalities and external integrations for banking operations. Working on the backend using PHP and TypeScript, and on the frontend with modern frameworks such as React and Vue.js. Experience in contributing to the continuous evolution of a highly complex banking system, ensuring the quality and efficiency of the solutions implemented.

Full Stack Developer/Engineer

Let's Sistemas - Software Factory

01/2022 – present
Guarapuava, PR,
Brazil

Working in a software factory, focusing on planning and developing customized systems for different companies. Working on the backend using PHP and the Laravel framework, and on the frontend with Vue.js to create scalable, high-performance solutions. Experience in different types of systems, including an electronic billboard and a payment gateway. Much of the work was carried out on an allocated basis, providing services directly to third-party companies, with a focus on meeting their specific needs and delivering efficient, quality solutions.

Other experiences

I have a diverse professional career, starting at the age of 14, with experiences that have given me a broad view of different areas. I worked in supermarkets as a packer, stocker, store clerk, delivery driver and checker, developing skills such as organization, teamwork and customer service. I served in the Brazilian Army for two years, where I acquired discipline, responsibility and the ability to act under pressure. I also worked in the industry as a production assistant and industrial machine operator, deepening my understanding of processes and operations. This trajectory prepared and motivated me to achieve my first opportunity in the technology area, as a developer.

2012 – 2021
Guarapuava, PR,
Brazil
